LONDON FOR ALL

A ROADMAP TO END POVERTY

Transportation

5.6 Explore innovative approaches to transportation, such as rideshare programs

In partnership with the LTC and the London Economic Development Corporation (LEDC), a Transit Summit “Getting People to Work Using Public Transit: Challenges & Solutions” was held in London on May 15, 2018. Discussion topics included encouraging businesses to promote carpooling and rideshare programs.

London’s Rideshare Program – is a free of charge, self-serve website that automatically matches you to similar commuters. It is available to all Londoners and anyone who regularly commutes to and from London from surrounding communities. Share rides to work, school and events with neighbours, co-workers, and friends. Save money, time and fuel and minimize your carbon footprint.

VRTUCAR - Community CarShare – VRTUCAR members gain access to a fleet of cars that can be reserved at low cost for 30 minutes, an hour, a day or longer, according to your needs. Located in the heart of London, the cars are available 24/7. Carsharing provides flexibility and freedom at a great price. VRTUCAR pays all the costs related to car ownership: purchasing, financing, registration, insurance, repairs, maintenance, and gas.
